

I am writing to express my concerns about the replacement of translated radio frequencies in my local area with the LPFM stations. One of the stations that my family enjoys most is KLOVE which we here on 106.7. I am unsure if it is a translator station but I do know that many KLOVE stations are.

KLOVE provides an tremendous service to families here in our local market, as well as nationwide. It is one of the few stations locally that provides a Christian message which is so different from that heard on most of our local stations. In addition, the station provides local event information for the Christian community here in the Raleigh area which is not available from other sources. I think that it would be sad for the local community to lose the positive voice we here on KLOVE and replace it with another station which might not provide such an encouraging and wholesome listening alternative.

Please help us keep our local KLOVE station on the air.

Sincerest Regards,

Robert D. Hagan, Jr
